# B90 CHICKPEA

AGT Foods is proud to offer the B90 Chickpea, the preferred chickpea for canners and hummus manufacturers around the world. Available exclusively from AGT Foods through its Saskcan brand, the B90 Chickpea is one of the best-processing chickpeas in the market today, featuring unique hydration properties that plump to an attractive size while maintaining the B90's firmness and deep colour.

## UNIQUE HYDRATION PROPERTIES

The B90 Chickpea features a condensed size that quickly expands to the internationally preferred calibre when hydrated, allowing buyers to ship greater volumes of product at a more efficient cost than larger-calibre varieties. The B90's smooth, dry appearance expands to take on the traditional appearance and shape of kabuli chickpeas when hydrated, a feature unique to the B90 Chickpea. Consumers favour the B90's richer and sweeter taste and impressive pearly colour, making it the preferred chickpea in the international marketplace.

The B90 Chickpea is offered in Sortex quality and is packaged in a premium quality 25 or 50 kilogram laminated polypropylene bag.

Contact AGT Foods for information and pricing on the B90 Chickpea.
